

Discover why home owners, builders, engineers and architects are making structure lock products their choice to help eliminate deflection, shear and vibration.

Cross bridging products for wood frame construction

- Custom Homes
- Modular Structures
- Apartment Buildings
- Pre-Fab Structures
- Heritage Buildings
- Townhouse / Walk ups
- Commercial Buildings

Our retrofit product is available for existing homes to help eliminate deflection

The measurement is easy as 1,2,3

1. Measure the flange width
2. Measure the height
3. Measure the on centre spacing
